

FACULTY OF INFORMATION TECHNOLOGY

UNIVERSITY OF MORATUWA, SRI LANKA

FOUR - WEEKLY CONTINUOUS ASSESSMENT REPORT SHEET

(To be submitted Four-Weekly (Every four weeks) to the Training Division and a total of 6 reports are expected by the end of training)

Refer also page 6 of Training Handbook

1. Name of Undergraduate (as appearing in the Undergraduate Register at the University)	Abeygunasekara K.N																							
2. Undergraduate Registration No.	1	8	4	0	0	1	K																	
3. Address, Phone Number and E-mail contact details during training	No 20, Karandagasthenna, Hiriwadunna.																							
	0	7	1	3	6	8	0	2	9	5	nimnaka.18@itfac.mrt.ac.lk													
4. Training Stage ⁽¹⁾	Level 3																							
5. Overall Training Period	From												To											
	1	0	/	0	1	/	2	0	2	2	2	4	/	0	6	/	2	0	2	2				
7. Name, Address and Phone No. of Training Establishment and Officer in charge of Undergraduate	Kaushalya Sandamali Pigera, Unicorn Solutions (Pvt) Ltd, 21/8A Chandra Silva Mawatha, Pagoda Rd, Nugegoda																							
	0 1 1 2 8 1 1 9 4 4																							
8. Report for four (4) week period	From												To											
	Week #												Week #											
	1	0	/	0	1	/	2	0	2	2	0	4	/	0	2	/	2	0	2	2				
9. Details on Undergraduate's:																								
9.1 Work ⁽¹⁾	Excellent				Good				Satisfactory				Poor											
9.2 Conduct ⁽¹⁾	Excellent				Good				Satisfactory				Poor											
9.3 Attendance ⁽¹⁾	Excellent				Good				Satisfactory				Poor											
9.4 Days of leave during month	Authorised				0				Unauthorised				0											
9.5 Comments by Engineer / Officer in charge of Undergraduate	Successfully contribute to the project. He is trying to learn about react js and our company coding behaviour and ready learn new things. He is a Good team player and done his job in the given time estimation. His contribution he made as an intern are appreciated.																							

10. Signature, Name and Official Seal of Engineer / Officer in charge of Undergraduate	 Kaushalya Sandamali Software Engineer
--	--

In the first week, I worked from home. In the first day, There was an introduction session. I got a big welcome from office and get details about the company. In the first few days, I learned how to work with the virtual machine and learned about the company. It was a great experience for me. Then I was assigned to study react language. Also, I was able to go to the meeting with seniors. Therefore, I could get good advice from seniors. Moreover, I got guidance documents about react. Then I learned to react basics in the first week.

In the second week, I improved my react knowledge while doing coding practicing. Then I got a clear idea about react life cycle, hooks, state. Also, I studied react with typescript, Then I got a clear idea of why react use typescript and what are the advantages can get if use typescript. Then I did some sample projects and practiced. Also, I studied redux and Fomik. I got an idea of how and why to use redux and learned workflow in redux. After I added redux to my sample project and practiced. I got guidance documents about redux and Fomik.

In my third week, I started studying .Net and C#. First I studied C# and get a basic idea about C#. After I studied .Net. I got a clear idea of how to create models, controllers, services in .Net. And also I created a project and combined my project with an SQL server. And also I studied entity framework. Then I self practiced react, redux with .Net by my sample project

Last week, I was assigned to an ongoing project. Then they created a group with interns and a mentor. First I clone that project in my VM and setup. After I self-studied that project code. The mentor gave an introduction about the project and gave a brief summary of what we will have to do. Also, the mentor describes coding flow how we should start and do work. After the mentor created sub-tasks and I was assigned to one of the tasks. I started my task and every day, my mentor review the code and show to me the correct flow.
